## Lidocaine Hydrogel Pain Relief Patch For Pain Relief

Item Number: ENLP01

### Introduction

Lidocaine hydrogel pain relief patch for targeted neuropathic & joint pain management. Clinically proven 68% pain reduction with 72-hour sustained release. Hypoallergenic & water-resistant.

[Learn More](#)

Parameter	Description
Pain relief	For local pain caused by neuropathic pain, musculoskeletal pain, joint pain and postherpetic neuralgia. Blocks pain signal transmission.
Ease of use	Simple application to affected area. Gradual drug release for continuous effect. Reduces gastrointestinal side effects compared to oral medication.
Healing promotion	Contains ingredients that stimulate fibroblast proliferation and migration, accelerating wound healing process for mild trauma.
Usage note	Follow medical advice. Monitor skin reactions. Discontinue use and consult doctor if discomfort occurs.
