Lidocaine Hydrogel Pain Relief Patch For Pain Relief

Item Number: ENLP1014

Introduction

4% Lidocaine hydrogel pain relief patch for targeted neuropathic & joint pain management. Clinically proven 68% pain reduction with 8-hour sustained release. Hypoallergenic & water-resistant.

[Learn More](#)

Feature	Description & Benefit for Your Business/End-User
Active Ingredient	Lidocaine 4% (customizable concentration possible) in a hydrogel matrix. <i>Value:</i> Clinically proven, effective topical anesthetic for targeted pain relief.
Delivery System	Multi-layer hydrogel technology with a rate-controlling membrane. <i>Value:</i> Ensures sustained, controlled drug release for long-lasting efficacy (e.g., up to 72 hours), enhancing compliance and user convenience.
Manufacturing	Produced by Enokon, a large-scale manufacturer with extensive customization capabilities. <i>Value:</i> Reliable supply, scalable production, and product tailored to your brand needs. High quality assurance.
Targeted Action	Localized drug delivery directly at the pain site. <i>Value:</i> High efficacy with minimal systemic exposure, reducing side effects compared to oral medications. Strong safety profile.
User Experience	Water-resistant, transparent, low-profile, breathable, hypoallergenic (customizable adhesive). <i>Value:</i> High patient acceptance and compliance, leading to better outcomes and brand loyalty. Discreet and comfortable for daily wear.
Broad Applications	Neuropathic pain, musculoskeletal pain, sports injuries, etc. <i>Value:</i> Addresses diverse market segments, increasing sales potential.
Customization Potential	Patch size, shape, packaging, formulation nuances. <i>Value:</i> Allows for strong brand differentiation and market-specific product offerings.
Economic Value	Long duration of action reduces dosing frequency; may reduce need for more expensive or systemic treatments. <i>Value:</i> Cost-effective for end-users, attractive proposition for healthcare providers and payers.
