

Far Infrared Knee Pain Patch Heat Patches For Pain Relief

Item Number: ENF1015

Introduction

Relieve Knee joint and muscle pain. Far infrared knee pain relief patch is a new type of pain relief patch, its main principle is to use far infrared to penetrate into the human body to achieve the effect of pain relief, Far infrared rays can relieve pain. After penetrating the human body, far infrared rays will accelerate blood circulation and promote metabolism, thereby eliminating local pain. In addition, far infrared rays can also improve immunity and antioxidant capacity, which has the effect of improving overall health. This product is suitable for pain caused by various soft tissue injuries and sports injuries, such as cervical spondylosis, shoulder peri-arthritis, lumbar disc herniation, rheumatoid arthritis, etc
